EDUCATION

International Institute of Information Technology Bangalore

2022 – 2024

Master of Technology in Computer Science and Engineering

CGPA-3.67/4

DIT University

2017 – 2021

Bachelor of Technology in Computer Science and Engineering

CGPA-9.28/10

Army Public School Hempur

2015 – 2016

Senior School Certificate Examination

Percentage-88.8/100

Army Public School Hempur

2013 – 2014

Secondary School Examination

CGPA-9.8/10

EXPERIENCE

Summer Training Program organized by iSMRITI at IIT Kanpur

June 2019 – July 2019

Summer Trainee

Kanpur, U.P.

- I attended a 40-day Summer Training Program on "Introduction to AI and IoT" organized by iSMRITI at IIT Kanpur. Explored the fundamentals of AI and IoT and developed innovative applications, including the "IoT Attendance Monitoring System using Raspberry Pi" project.

PROJECTS

Ad Worthy or Not? | Natural Language Processing, Machine Learning, Python

2022

- Created a machine learning model to foresee which web pages will receive extortionate, enduring traffic. Translated the data sets textual properties into some kind of numerical data and then built machine learning model using this numerical data, this job intended to use the application of computational techniques to the analysis and synthesis of natural language.

My Task Guru | Git, Jenkins, Ansible, Docker, Docker Compose, ELK Stack

2023

- Skilled in architecting and deploying effective DevOps pipelines for web applications, leveraging expertise in technologies such as Docker, Jenkins, and Ansible. Streamlined development, deployment, and monitoring processes to enhance efficiency and productivity. Made significant contributions to the development of My Task Guru, successfully implementing robust CI/CD pipelines and containerization techniques, resulting in seamless and efficient application delivery.

Integration of Hospital System with ABDM (Ayushman Bharat Digital Mission) | React, Spring boot, MySQL, ABDM Sandbox

2023

- Developed and deployed a comprehensive hospital health information system, incorporating essential use cases and an integration layer to seamlessly connect the system with the ABDM sandbox. Effectively retrieved and shared patient data from the hospital by leveraging the ABDM framework, ensuring compliance with patient consent protocols facilitated by the ABDM PHR (Personal Health Record) app. Implemented FHIR (Fast Healthcare Interoperability Resources) compliance standards to enable seamless exchange of health records within the system.

TECHNICAL SKILLS

Languages: C++, C, Python

Tools: Postman, Git, Jenkins, Ansible, Docker, Docker Compose, Hibernate, ELK Stack

Frameworks: Spring Boot

Library: React

Databases: MySQL

- Algorithms
- Database System
- Computer Network
- Operating System
- System Software
- Machine Learning

LEADERSHIP / EXTRACURRICULAR

Google Student Community

2019 – 2021

Member

DIT University

- Executive team member of Code Chef Campus Chapter.
- As part of Google Student Community assisted chapter of 40+ members to learn a range of technical topics and gain new skills through hands-on workshops, events, talks, and project-building activities.
